

Rear Sight

The rear sight is made from three main pieces:

- 1x 20mm x 65mm rectangle in 3mm.
- 1x 15mm x 20mm rectangle in 5mm.
- 1x 20mm x 5mm rectangle in 5mm.

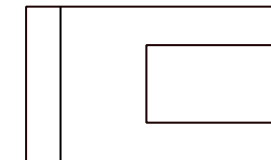

Then just add on 2x 2mm circles

Front Sight

The front sight is made of two main pieces:

- 1x 10mm x 20mm rectangle in 10mm
- 1x 20mm x 35mm rectangle in 5mm

Hammer

Use 10mm foam to make the hammer.

Main Pistol Body

The main body is 20mm thick, so cut it out of two 10mm pieces.

Screws and Details

All screws and detail pieces are 2mm foam.

Insignia

Carefully cut out the logo and glue it in place after painting but before you weather it.

Rear chamber

Cut a 50mm foam sphere in half to use as the rear of the chamber and to glue the barrel to.

Barrel

Barrel to be made from 5mm rectangle of foam 200mm by 145mm in 5mm foam. This includes a 5mm addition for the scarf bevels. Cut opposite bevels along each long edge to use as a scarf joint to minimise seam pull. Or, you could use a 50mm foam dowel.

Detail Piece

Use 2mm foam for this detail

Trigger

Use 10mm foam to make the trigger.

Grips

Use 10mm foam to make the grips.

Pommel

Use a 20mm foam sphere for this part and 10mm foam dowel to make the ring.

Spare Insignias for the grip

HELLBOY

The Samaritan

Lower Body

The lower body is made up of two main pieces:

- 1x 160mm x 30mm rectangle of 18mm. (Suggest this is built up of 10, 5 & 3mm layers and a 10mm foam dowel for the hinge).
- 1x 100mm x 20mm at 13mm. (Suggest this is built up of 2 x 10mm layers due to curved shape).

Then just add on 2x 2mm circles

To glue this onto the barrel, it's recommended to sand in a slight recess to the top side, so it sits snugly underneath the barrel.
